Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Folding the mailer as described results in recipient's address being concealed and therefore undeliverable via the mail system. Claim language is inconsistent with terminology used in specification to identify mailer sides.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2165

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-20, and 27-29 are rejected under U.S.C. 102(e) as being anticipated by Dodd, patent number 6,321,211.

Dodd teaches all limitations of claims 1-20 and 27-29. For example, Dodd discloses an online system, method, and article of manufacture that produces a combined gift certificate and greeting card whereby the combined certificate and card are mailed electronically to the recipient's email address. The actual certificate or coupon is mailed through the traditional postal system. Dodd teaches a graphical user interface displayed on a remote user computer used to select from a plurality of merchants and locations, the desired gift certificates, amounts, style of greeting card, and sentiment (see at least abstract; Fig. 1a (100); Fig. 2a (100); col. 1, line 59 through col. 2, line 51; col. 9, lines 49-51). Inherent in the system and method of Dodd is the capability to offer as a gift item

is a card of value from a particular merchant and if selected as a gift, would be mailed by the same means as the printed certificate or coupon.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-26 are rejected under U.S.C. 103(a) as being unpatentable over Dodd, in view of Spector, patent number 5,870,718.

Dodd teaches all the above and including the mailing of the actual certificate or coupon through the traditional postal system, but fails to disclose details regarding printing the combined card and certificate and method of folding.

Spector teaches an online system for producing a composite greeting and gift certificate card that is mailed to the recipient using the traditional postal system (see at least abstract; Fig. 1(C-P, 10); col. 2, line 35 through col. 3, line 7).

Spector teaches a combined card and certificate printed on one side and perforation to separate the certificate from the social sentiment created by the sender (see at least Fig. 2 (GS, CS); col. 4, lines 1-13). This examiner takes the position that double-sided printing for the purpose of printing addresses on the opposite side is well known in the art. Therefore it would have been obvious to

Art Unit: 2165

one of ordinary skill in the art at time of the invention to modify the system and method of Dodd to include the combined card and certificate as taught by Spector, in order to provide a more personal touch for the occasion in the form of a physical card and gift.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- US 5,513,117 (Small) 30 April 1996; teaches electronically dispensing personalized greeting cards and gifts, and includes a locator service.
- "GiftPro.com Makes Sending a Gift Certificate From Many Major Retailers and Restaurants Easy," Business Wire, 25 May 1998, Dialog file 20, 01711048; teaches a national online service that combines gift certificates with a greeting card.
